

How must our knowledge be systematically organized in order to justify our beliefs? There are two options?the solid securing of the ancient foundationalist pyramid or the risky adventure of the new coherentist raft. For the foundationalist like Descartes each piece of knowledge can be stacked to build a pyramid. Not so, argues BonJour. What looks like a pyramid is in fact a dead end, a blind alley. Better by far to choose the raft. Here BonJour sets out the most extensive antifoundationalist argument yet developed. The first part of the book offers a systematic exposition of foundationalist views and formulates a general argument to show that no variety of foundationalism provides an acceptable account of empirical justification. In the second part he explores a coherence theory of empirical knowledge and argues that a defensible theory must incorporate an adequate conception of observation. The book concludes with an account of the correspondence theory of empirical truth and an argument that systems of empirical belief which satisfy the coherentist standard of justification are also likely to be true.

Preface; I. A Critique of Empirical Foundationalism. 1. Knowledge and Justification. The traditional conception of knowledge; The concept of epistemic.

The Structure of. Empirical Knowledge. LAURENCE BONJOUR. University Press. CAMBRIDGE, MASSACHUSETTS, AND LONDON, ENGLAND. The Structure of Empirical Knowledge (BonJour,) is a detailed and subtle defense of a coherentist account of epistemic justification. It can plausibly be claimed that it is unsurpassed, in thoroughness and sophistication, by any other sympathetic treatment of coherentism. 1 Knowledge and Justification This book is an investigation of one central problem which arises in the attempt to give a philosophical account of empirical.. .
